

Jessica Alba Dynasty League – 2021 Rookie Draft Review

I. Introduction

Firstly, thanks to everyone for getting together for the draft and an enjoyable evening. We made it through the inaugural Rookie Draft relatively unscathed and I think it's safe to say there were some surprises! Once again I'll be addressing the questions: Is your team as good/bad as you think? Are you winning now or looking to secure some of the top picks? Where might people need to trade to improve their team to push them up the rankings? Did the draft actually matter?

All these questions will not get answered and there will only be numerous other questions like: is our Commissioner deluded? Is Chris' team any good? Why is Gareth's team still so old? One thing that is for sure – I'm delighted we all have more imaginative team names.

II. Rule Change

Thank you all for agreeing to the one change to the rules I presented before we started. I'll send updated by-laws soon but to confirm:

- Toilet bowl winner receives the 1.01.
- Loser of All Losers takes the Golden Turd trophy.
- Remaining three participants in inverse order of maximum potential points (as calculated by Sleeper) take 1.02 – 1.04.
- Champion and Runner-up take 1.10 and 1.09, respectively.
- Remaining four playoff teams in inverse order of maximum potential points (as calculated by Sleeper) take 1.05 – 1.08.

To note: Sleeper includes Taxi Squad in potential points so keeping a stud on taxi will not benefit in draft position.

Hopefully, this change will help keep the league competitive long-term and still give something for non-playoff teams to play for.

III. 2021 Rookie Draft

So the draft board finished as the table below:

Round 1	Round 2	Round 3	Round 4	Round 5
1. T Lawrence QB – Dave	1. D Smith WR – Dave	1. P Freiermuth TE – Dave	1. D Eskridge WR – Dave	1. E Mitchell RB - Dave
2. J Fields QB - Rich	2. J Waddle WR – Rich	2. T Marshall WR - Rich	2. B Jordan TE – Rich	2. J Jefferson RB - Rich
3. K Pitts TE - Mike	3. M Carter RB – Mike	3. D Fitzpatrick WR – Mike	3. C Evans RB – Mike	3. J Palmer WR - Mike
4. N Harris RB – Neil	4. A St. Brown WR – Neil	4. R Stevenson RB – Ross (from Neil)	4. T Wallace WR – Neil	4. D Mills QB - Neil
5. J Chase WR - Lee	5. R Bateman WR – Chris (from Lee via Alex)	5. D Brown WR - Lee	5. J Hawkins RB – Lee	5. K Hill RB - Lee
6. T Lance QB - Lee (from Chris)	6. T Sermon RB - Lee (from Chris)	6. C Hubbard RB – Alex (from Chris)	6. T Atwell WR – Chris	6. K Trask QB - Chris
7. T Etienne RB - Lee (from Jebus)	7. E Moore WR - Dave (from Jebus)	7. N Collins WR - Lee (from Jebus)	7. G Doaks RB – Jebus	7. J Harris WR/TE - Jebus
8. Z Wilson QB – Chris (from Alex)	8. R Moore WR - Lee (from Alex)	8. K Gainwell RB - Ross (from Alex)	8. L Rountree RB – Alex	8. H Long TE - Alex
9. J Williams RB – Gareth	9. A Rodgers WR – Gareth	9. K Mond QB - Gareth	9. D Newsome WR – Gareth	9. M Stevenson WR - Gareth
10. M Jones QB – Ross	10. K Toney WR – Ross	10. S Williams WR - Ross	10. A Schwartz WR – Ross	10. J Patterson RB - Ross

Dave of course took Trevor Lawrence at the 1.01 but after that will things got interesting. Despite a lot of QB needy teams in a superflex league *and* an outstanding intake of rookie QBs, only two QBs were taken in the first five picks!

The draft was dominated by Lee with his 9 picks but it'll be remembered for two moments: Chris handing the keys to his WR sportscar (Diggs) to Alex so he could pick up a much needed QB and a 28 year old RB; and Noah Fant being inexplicably devalued to a third round pick by Ross. An absolute steal from Neil but what did Ross buy with that third rounder? A backup running back at the always fantasy relevant New England Patriots. Maybe this will be seen as a moment of genius in future? From a RB with fourth round draft capital the odds are well and truly stacked against it.

Before I analyse each team I thought I'd explain the data I've used. The dynasty values come from the highly useful but not infallible KeepTradeCut from their over 700k crowdsourced data points. As we all know value $\neq$ production so I've used a tier-based analysis to try to estimate the relative value of our

players for this season. The theory being that the teams with the greatest number of high tier players have the most chance of winning.

The 'Top Ave' which will form the basis of my assessments is based on the top three QBs, RBs and WRs and two TEs. This covers your best two, plus potential flexes, injuries and waiver cover. Not infallible but the best I could come up with. Tiers are based on consensus of 63 experts. The output number is the average tier of your players in each position and overall.

I've very helpfully RAG'd the rankings but it's best to say that this is just a relative guide. It is not suggested that teams are bad just that, relatively speaking, if you were to ask the average expert, they'd rather take the core or team in other people's teams. Indeed, if you look at the 'top ave' overall there's not too much in it. One top tier trade could be the difference between third and eighth.

Also, Lee has very kindly provided me with a return on investment (ROI) analysis for each pick – players vs pick value, based on KTC values. This gives a little bit of insight on our drafting skills and I'm looking forward to recasting it in 8 months' time when we see the actual results of these players actually taking snaps in the NFL. To whet your appetite, as a collective we drafted players on average 11.6% above the value of the pick. Well done everyone!

IV. Dak to the Future – Dave

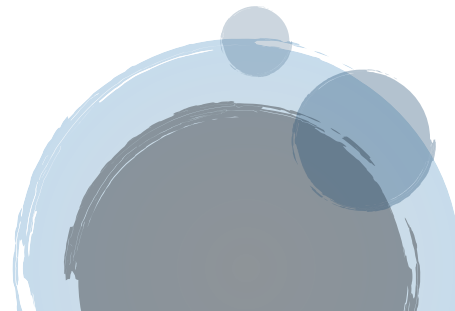

QB		Dyansty		2021 Draft Tiers			
Age	Rank	Value	Rank	Team Ave	Rank	Top Ave	Rank
28.45	7	29,195	1	4.0	4	3.0	2
RB		Dyansty		2021 Draft Tiers			
Age	Rank	Value	Rank	Team Ave	Rank	Top Ave	Rank
25.26	7	35,533	1	4.9	1	3.0	3
WR		Dyansty		2021 Draft Tiers			
Age	Rank	Value	Rank	Team Ave	Rank	Top Ave	Rank
24.86	3	39,613	5	6.7	10	3.7	9
TE		Dyansty		2021 Draft Tiers			
Age	Rank	Value	Rank	Team Ave	Rank	Top Ave	Rank
25.77	5	12,266	3	4.0	6	2.5	5
Overall		Dyansty		2021 Draft Tiers			
Age	Rank	Value	Rank	Team Ave	Rank	Top Ave	Rank
26.19	8	116,607	2	4.9	6	3.0	4

Dave obviously added the consensus top QB but also two WRs in the second round, the second best ranked TE and two dart throws. Dave's 6 picks gave him an ROI of 14.4%, making him our third best picker. But what affect does it have on his long- and short-term prospects?

Well, long-term Dave's maintained his overall team ranking of 2. He's still a little short at WR but top 3 everywhere else. He must be fairly relaxed about his long-term prospects and drafting 'skills'.

However, a 2021 tier ranking of joint fourth suggests he's still missing those studs to push him over the line. Dave's safe at QB and RB (with plenty of backup in the latter) now and in the future but a bit short relatively everywhere else to put him into the top tier of contenders. Certainly a rank of 9 at WR needs to be improved to be a real contender.

Can he make some moves to put him in a position to win the championship or will he look to improve his one dynasty (and current) shortfall with a look at a 2022 and beyond winning team? He's possibly got the players to kill two birds with one stone if he can find the right trading partner.

V. Inch by Inch – Rich

QB		Dyansty		2021 Draft Tiers			
Age	Rank	Value	Rank	Team Ave	Rank	Top Ave	Rank
35.81	10	19,745	7	4.2	5	3.3	7
RB		Dyansty		2021 Draft Tiers			
Age	Rank	Value	Rank	Team Ave	Rank	Top Ave	Rank
23.87	3	24,947	7	5.8	4	3.0	3
WR		Dyansty		2021 Draft Tiers			
Age	Rank	Value	Rank	Team Ave	Rank	Top Ave	Rank
26.52	7	43,106	2	5.0	1	2.0	1
TE		Dyansty		2021 Draft Tiers			
Age	Rank	Value	Rank	Team Ave	Rank	Top Ave	Rank
28.32	8	5,544	10	4.3	10	3.5	10
Overall		Dyansty		2021 Draft Tiers			
Age	Rank	Value	Rank	Team Ave	Rank	Top Ave	Rank
26.87	9	93,342	4	4.8	5	3.0	4

Rich used his first pick to add a top class QB who's likely to start sooner rather than later. He also picked up two well regarded WRs and two dart throws. Rich's 5 picks gave him an ROI of 9.7%, making him our seventh best picker. But what affect does it have on his long- and short-term prospects?

Rich has moved his overall dynasty ranking from 8 to 4, securing what looked like a concerning viability of the team. A closer look raises those concerns again. His teams value seems to be propped up by his WRs. QB and RB rankings of 7 must be concerning but last at TE in the future and now has got to be addressed through trades or future picks. Also of concern must be the average age of his QBs is still over 35 despite adding a rookie QB!

Maybe the dynasty values are low so Rich is looking to compete now? Whilst supported by those WRs and his RBs pushing him to a joint fourth win now ranking, those TEs and QBs are letting him down. Some more certainty for last season's MVP and an early breakout for Fields will be Rich's main concerns as the season approaches. Oh and he needs a good TE.

With a four and four overall ranking, can Rich make some moves to patch up the holes or should he trade in those assets for a crack at a future championship?

VI. Tompa Bay Bucs – Mike

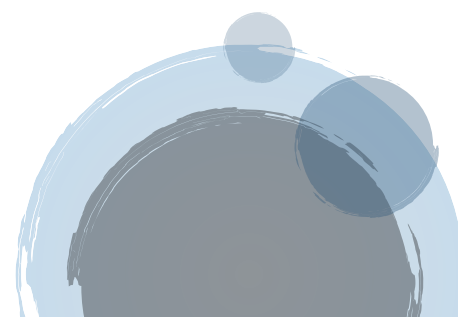

QB		Dyansty		2021 Draft Tiers			
Age	Rank	Value	Rank	Team Ave	Rank	Top Ave	Rank
24.88	2	24,460	2	3.6	3	2.7	1
RB		Dyansty		2021 Draft Tiers			
Age	Rank	Value	Rank	Team Ave	Rank	Top Ave	Rank
22.36	1	22,816	9	6.6	9	3.7	8
WR		Dyansty		2021 Draft Tiers			
Age	Rank	Value	Rank	Team Ave	Rank	Top Ave	Rank
25.87	5	30,029	9	6.3	6	2.7	3
TE		Dyansty		2021 Draft Tiers			
Age	Rank	Value	Rank	Team Ave	Rank	Top Ave	Rank
24.33	2	14,818	1	4.0	6	2.0	3
Overall		Dyansty		2021 Draft Tiers			
Age	Rank	Value	Rank	Team Ave	Rank	Top Ave	Rank
24.36	1	92,123	5	5.1	8	2.8	3

Mike's very youthful team had no particular need for the addition of any further youth, even more so for his young and top ranking QB core, yet he had some early value so what did he do with it? Well, he took the BPA approach and gave into the temptation to take Pitts. He also added a reasonable RB and WR and two dart throws. Mike's 5 picks gave him an ROI of -6.7%, making him our worst picker.

Despite the improvement he made at what could be considered an area of need, Mike's overall team ranking of 5 is a fall from the pre-draft ranking of 4. With 9th place rankings at RB and WR he must be a little concerned with the future? Mike's young but low value RB core must be his biggest concern. Will he regret not taking Najee or Etienne?

Whilst he has future concerns how is Mike looking now? He's the clear number 3 and not far behind the top two so must be filled with some confidence. Mike has the top QB core and, with his acquisition of Pitts, third in the receiving positions. Of concern must be the 8th ranking RB core. Whilst there's no doubting the potential of Taylor, Swift is in a difficult situation at the Lions and then there is a drop-off in quality. One injury here could see Mike sinking to Golden Turd territory.

His young players coming good and staying fit may see him through to a championship but will he take that gamble or try to trade up and compete with (or replace) the top two?

VII. Canton Giants – Neil

QB		Dyansty		2021 Draft Tiers			
Age	Rank	Value	Rank	Team Ave	Rank	Top Ave	Rank
28.80	8	7,971	10	5.5	10	5.0	10
RB		Dyansty		2021 Draft Tiers			
Age	Rank	Value	Rank	Team Ave	Rank	Top Ave	Rank
25.85	10	25,001	6	6.2	7	3.3	7
WR		Dyansty		2021 Draft Tiers			
Age	Rank	Value	Rank	Team Ave	Rank	Top Ave	Rank
25.41	5	30,424	8	6.2	5	4.0	10
TE		Dyansty		2021 Draft Tiers			
Age	Rank	Value	Rank	Team Ave	Rank	Top Ave	Rank
24.40	3	9,234	6	2.7	3	2.5	5
Overall		Dyansty		2021 Draft Tiers			
Age	Rank	Value	Rank	Team Ave	Rank	Top Ave	Rank
25.73	4	72,630	10	5.1	8	3.7	10

Neil needed investment across his team so how did he do in the draft? He took the RB1 with the workhorse role and an Egyptian god WR and two dart throws. He also picked up Noah Fant who could slip straight into his team! Great piece of business. Neil's 4 picks gave him an ROI of 14.2%, making him our fourth best picker.

I'm sorry to say that despite these improvements, Neil's team continues to rank dead last in dynasty value. He's improved his RB and TE cores but these are still relatively low dynasty values and no starting QB3.

The picture sadly does not look any brighter when we look at present tier values ranked 10 at QB and WR and 7th at RB. The acquisition of Fant has however pushed his TEs into the upper half (just).

If the projections come to pass it must be time for Neil to consider shifting the assets he has with an eye on securing young players and/or additional future picks to make a crack at a longer-term secure future.

VIII. JazzyJeff&TheFreshJameis – Lee

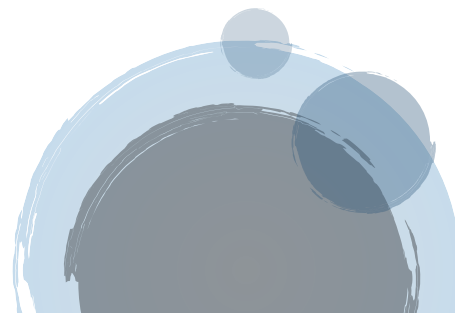

QB		Dyansty		2021 Draft Tiers			
Age	Rank	Value	Rank	Team Ave	Rank	Top Ave	Rank
27.14	6	20,432	6	4.5	7	4.3	9
RB		Dyansty		2021 Draft Tiers			
Age	Rank	Value	Rank	Team Ave	Rank	Top Ave	Rank
24.05	4	30,708	2	6.5	8	4.7	10
WR		Dyansty		2021 Draft Tiers			
Age	Rank	Value	Rank	Team Ave	Rank	Top Ave	Rank
24.04	1	53,521	1	5.8	4	2.7	3
TE		Dyansty		2021 Draft Tiers			
Age	Rank	Value	Rank	Team Ave	Rank	Top Ave	Rank
30.42	10	13,893	2	2.0	1	1.5	1
Overall		Dyansty		2021 Draft Tiers			
Age	Rank	Value	Rank	Team Ave	Rank	Top Ave	Rank
25.76	5	118,554	1	4.7	3	3.3	9

Bloody hell that team name is hard to pronounce. Perhaps there should be some kind of word limit? So how did the man with three first round picks fare in the draft? I think it safe to say he was somewhat surprised to be taking a choice of QBs, settling on Shanahan's preferred rookie along with the No.1 WR prospect and one of the top rated RBs. The latter pick may be the biggest benefit to his side in 2021 with his shortage a workhorse RBs. Other than those three Lee picked up a couple of reasonably rated WRs and RB and some dart throws. Lee's 9 picks gave him an ROI of 12.5%, making him our fifth best picker.

Lee's overall team dynasty ranking remains at number 1 with his early rebuild looking to be paying off. He's top two everywhere except QB. The sale of his top QB has not helped this and he'll be hoping for improvements in his existing roster or will need to make a move to improve this area.

Outside his QBs Lee seems set for the future but what about now? Well, it's not such a rosy picture. Lee's young and extensive RB core continues to be built on hopes and dreams, ranked 8th overall and 10th for his top players. This along with his 9th place for QBs results in a 9th overall rank for 2021. WR and TE is a different story where he's ranked 3rd and 1st, respectively.

So, what does Lee do this year? The enigma from the Westcountry may not agree with experts and want a crack at 2021. He'll need to make a move, particularly at RB to do that. Or could he resist this temptation and take the more sustainable approach he's already started on the path of and contend for 2022 and 2023 and pick up another highly rated QB by not being so competitive and getting rid of that old TE and one of his plethora of class WRs for some young players and even more picks.

IX. HotChubbTimeMachine – Alex

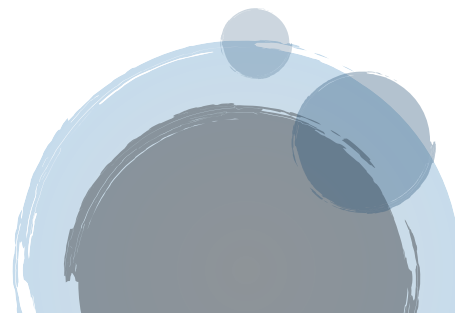

QB		Dyansty		2021 Draft Tiers			
Age	Rank	Value	Rank	Team Ave	Rank	Top Ave	Rank
25.53	4	17,748	9	3.5	7	3.0	2
RB		Dyansty		2021 Draft Tiers			
Age	Rank	Value	Rank	Team Ave	Rank	Top Ave	Rank
24.44	6	30,364	3	5.8	4	3.0	3
WR		Dyansty		2021 Draft Tiers			
Age	Rank	Value	Rank	Team Ave	Rank	Top Ave	Rank
26.73	8	42,422	3	5.3	3	2.00	1
TE		Dyansty		2021 Draft Tiers			
Age	Rank	Value	Rank	Team Ave	Rank	Top Ave	Rank
27.58	7	9,733	4	4.0	6	2.5	5
Overall		Dyansty		2021 Draft Tiers			
Age	Rank	Value	Rank	Team Ave	Rank	Top Ave	Rank
25.81	6	100,267	3	4.6	2	2.6	2

So how did Alex's draft go? He picked up Stefon Diggs with his first and second round picks so he'll be pleased with. Otherwise, he received CMC's new backup and two dart throws. Yet another sensible bit of drafting from Mr Newberry. Alex's 3 picks gave him an ROI of 33.1%, making him our best picker.

So how does Al's roster look now for the long-term. Pretty good. He maintained his third place ranking overall and at RB and WR means he's in a pretty good spot for the next few years. His biggest area of concern must be those aging QBs and Drew Lock. At 9th for QB this must be a spot he'll need to improve on long-term.

Al's got a good long-term outlook so he's going to be bad this season, right? No – Alex seems to be finding the right balance of production now and long-term value. With CMC back fit and the addition of Diggs he's just behind our No.1 team. Whilst there may be long-term QB concerns he's ranked 2nd for this year, and in at No.1 at WR. His third place at RB indicate there may be a small weakness in his team if either of his starters gets injured. The one obvious weak spot appears to be TE but if Kittle stays fit he's got to be in with a shout of wearing that belt at the beginning of 2022.

It looks like Al is in contention for this year and next. He seems to have the most balanced of all the rosters. Maybe a move for a backup RB this year would be sensible or a play to improve his QB core with an injection of youth will be on the cards for this off season.

X. I am the Waller & Russ – Gareth

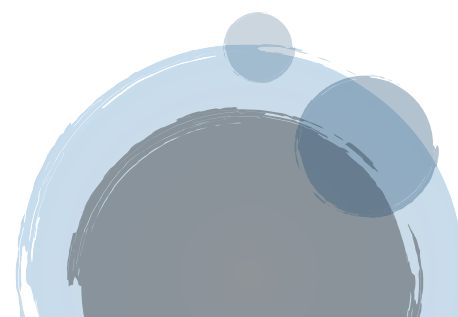

QB		Dyansty		2021 Draft Tiers			
Age	Rank	Value	Rank	Team Ave	Rank	Top Ave	Rank
32.00	9	20,625	5	4.4	6	3.0	2
RB		Dyansty		2021 Draft Tiers			
Age	Rank	Value	Rank	Team Ave	Rank	Top Ave	Rank
23.26	2	26,739	4	5.8	4	4.3	9
WR		Dyansty		2021 Draft Tiers			
Age	Rank	Value	Rank	Team Ave	Rank	Top Ave	Rank
27.69	10	32,730	7	6.5	8	3.3	8
TE		Dyansty		2021 Draft Tiers			
Age	Rank	Value	Rank	Team Ave	Rank	Top Ave	Rank
28.37	9	9,371	5	2.0	1	2.0	3
Overall		Dyansty		2021 Draft Tiers			
Age	Rank	Value	Rank	Team Ave	Rank	Top Ave	Rank
28.06	10	89,465	7	4.7	3	3.1	7

So, what do the old men of Waller & Russ do with a draft and the necessary injection of youth it brings? Well, the picks weren't traded away! Instead, they were injected once again into the RB position with Javonte Williams adding to an already fresh-faced RB core. Otherwise, G picked up a reasonable WR and Cousins' backup and two dart throws. Gareth's 5 picks gave him an ROI of 11.9%, making him our sixth best picker.

Does the oldest team hold any long-term dynasty value? Not really, no. He didn't improve on his overall 7th ranking and it's not looking good in the long run. With middle of the road rankings across the board, even those young RBs can't push his dynast rank above top 4 value. The whole roster needs a bit of a refresh in the coming years, mainly because a lot of his players will be retiring if nothing else.

He's 7th with Dynasty value but drafting older players must give G a fighting chance to win now, eh? Er, no. At 7th for this year, it doesn't appear that G's team is quite ready to compete. However, his QB and TE cores are top three and ready to go but he must improve on the RB (9th) and WR (8th) in order to compete. These two positions are really dragging his side down.

Like with others who have a lot of work to do to complete this year, should G consider selling off his old men, pick up some picks and youth and make a play for 2022 and beyond? Otherwise, can he find a buyer for Waller who give him RB and WR gems to help his team to compete now. Either way the man needs to start trading before he's left behind this season and in the future.

XI. Justin Allentown– Ross

QB		Dyansty		2021 Draft Tiers			
Age	Rank	Value	Rank	Team Ave	Rank	Top Ave	Rank
24.24	1	23,586	4	3.0	1	3.0	2
RB		Dyansty		2021 Draft Tiers			
Age	Rank	Value	Rank	Team Ave	Rank	Top Ave	Rank
24.25	5	25,266	5	7.3	10	3.0	3
WR		Dyansty		2021 Draft Tiers			
Age	Rank	Value	Rank	Team Ave	Rank	Top Ave	Rank
24.73	2	29,984	10	6.3	6	3.0	6
TE		Dyansty		2021 Draft Tiers			
Age	Rank	Value	Rank	Team Ave	Rank	Top Ave	Rank
26.83	6	7,126	8	4.0	6	3.0	8
Overall		Dyansty		2021 Draft Tiers			
Age	Rank	Value	Rank	Team Ave	Rank	Top Ave	Rank
24.45	2	85,962	9	5.1	8	3.0	4

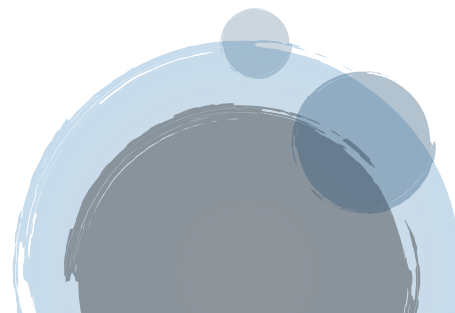

I've waxed lyrical about Ross's team before but how does it look now the draft's been completed and the schedule is out? Before I come to that how did Ross's draft go? Elephant in the room aside, Ross secured a much-needed QB in the first round, a well rated WR and four dart throws. Oh, by the way, one of those dart throws cost Ross Noah Fant. Ross' 6 picks gave him an ROI of -6.2%, making him our ninth best picker. I hope Ross's confidence in Mac Jones and him taking over at the New England Patriots works out, otherwise trading Fant for their backup RB may look a little bit overly ambitious from the reigning belt holder. He made these reaches last year so maybe he knows something the rest of us don't?

So what is Ross's small roster's dynasty value? Well, it's not great. He's dropped down the rankings to 9th. Ross may have forgotten that this is a team game. His lack of players at almost every position means that his dynasty values really suffer. He's 10th at WR and middle of the pack at QB and RB. He needs those dart throws to hit or he's going to be having some problems in the future.

Ross has a small team with limited dynasty value - so what as long as it wins? Well, whilst his QB and RB cores are top three value, losing Godwin and Fant has hit his small team hard. His WR and TE cores are 6th and 8th, respectively. This puts him in joint 4th behind the top contenders and fighting for contention with two others. Ross's team has some great starting value but injuries like we saw other teams take last year could move him down to picking up the Golden Turd very quickly.

Ross has some interesting decisions to make over the summer. Does he hold, hope that no injuries hit him, they hit other teams and pray that his rookies and waiver wire moves see him through? Can lightning really strike twice? That's a pretty big gamble. Alternatively, he could trade one or two of his big assets to either: get some immediate production at WR and TE and have a crack at retaining his title;

or, pick up some players and picks to plug his dynasty holes but not compete this year. He's already traded two assets looking to secure his future so is that where he's headed?

XII. Newbrook Falcons – Chris

QB		Dyansty		2021 Draft Tiers			
Age	Rank	Value	Rank	Team Ave	Rank	Top Ave	Rank
25.06	3	24,338	3	4.6	9	3.7	8
RB		Dyansty		2021 Draft Tiers			
Age	Rank	Value	Rank	Team Ave	Rank	Top Ave	Rank
25.69	9	23,462	8	5.0	2	2.7	2
WR		Dyansty		2021 Draft Tiers			
Age	Rank	Value	Rank	Team Ave	Rank	Top Ave	Rank
25.37	4	33,690	6	6.5	8	3.3	8
TE		Dyansty		2021 Draft Tiers			
Age	Rank	Value	Rank	Team Ave	Rank	Top Ave	Rank
23.53	1	6,222	9	3.7	5	3.0	8
Overall		Dyansty		2021 Draft Tiers			
Age	Rank	Value	Rank	Team Ave	Rank	Top Ave	Rank
25.38	3	87,712	8	5.0	7	3.2	8

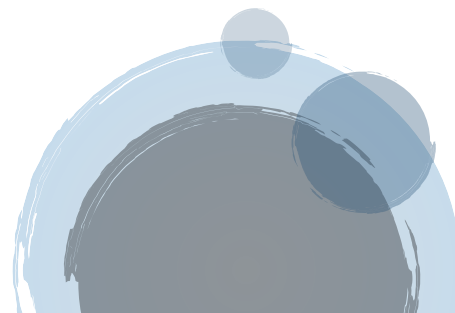

This is likely to be the most contentious review, mainly because I'm not going to hear the end of it if the 63 experts who do this for a living don't agree with Chris' individual values. So, do they? Will I be left in peace? Spoilers: there's a lot of red in that table above!

Chris' draft went well for a man who sold his first two picks! How so? He traded his No.1 WR for a 28-year-old RB but most importantly Alex's 1st and 2nd round picks. So what did he do with these picks? He made the very sensible decision of grabbing another young starting QB. Morales of having a sex pest aside, the uncertainty of him starting, along with the risk of the 1st round pick replacing his other old QB and a man whose knee had to be completely reconstructed (three season ending injuries in one!) things were looking a bit uncertain in his QB room. He also picked up a highly rated WR, a decent WR (who is smaller than his son) and two dart throws. Chris' 4 picks gave him an ROI of 31.0%, making him our second best picker.

What did that business do to his team's dynasty value? Well, it did improve it from 9th to 8th but that's not great. His QB business has put him in the top 3 so he's set there for some time to come and if Watson pays off his masseurs that is only headed up. Headaches remain, particularly at RB and TE. The age profile of his RBs is frightening so this will need fixing at some point and Gronk will retire before Brady does (probably).

"But noble Commissioner, is it not a low value, high production team?" Unfortunately, no. He has a top 2 RB core but not much else. Everywhere else is ranked 8th and so that's where his team lies overall. He has some good players but many have a degree of uncertainty hanging over their heads. This rank may change closer to the season but it's not going to reduce the age and injury profile of his players. He'd

need nearly every younger player to break out and some extraordinary falls at other teams to compete. An injury to Cook and the Golden Turd could be taking a short trip from Canton to Penarth pretty quickly. What are his options? Well they're not too dissimilar to others mentioned previously. Try to trade to plug holes at QB, WR and TE, pray for injuries to others and an NFL coaches eye on prospects and hope he can win now. Or, sell those big assets for maximum value, like he's already done and eye titles in 2022 and beyond. Can 63 experts really be wrong on every player but Dalvin Cook?

XIII. Saquontum Leap – Jebus

QB		Dyansty		2021 Draft Tiers			
Age	Rank	Value	Rank	Team Ave	Rank	Top Ave	Rank
25.84	5	19,472	8	4.5	7	3.0	2
RB		Dyansty		2021 Draft Tiers			
Age	Rank	Value	Rank	Team Ave	Rank	Top Ave	Rank
25.62	8	20,686	10	5.2	3	2.3	1
WR		Dyansty		2021 Draft Tiers			
Age	Rank	Value	Rank	Team Ave	Rank	Top Ave	Rank
26.87	9	41,329	4	5.1	2	2.7	3
TE		Dyansty		2021 Draft Tiers			
Age	Rank	Value	Rank	Team Ave	Rank	Top Ave	Rank
25.51	4	8,772	7	2.7	3	1.5	1
Overall		Dyansty		2021 Draft Tiers			
Age	Rank	Value	Rank	Team Ave	Rank	Top Ave	Rank
26.12	7	90,259	6	4.4	1	2.4	1

How do you review a draft with only two late round picks? Well, you don't review the draft. Jebus drafted two dart throws. Jebus' 2 picks gave him an ROI of 1.8%, making him our eighth best picker. Those three missing picks gained him Michael Thomas and Saquon Barkley. He's probably hoping those two stay fit this year otherwise he's fucked. More on that later.

Well not adding any valuable young players unsurprisingly moved Jebus' dynasty rank from 5th in overall value to 6th. His team's dynasty value is being propped up by his WR core but at 4th that's not saying much. With QBs ranked at 8 and RB at 10 it looks like it's now or never for Jebus. So is it?

Well with top three value at every position and an overall rank of 1 it appears it is! So are there any chinks in this armor. Mos def. His QB core includes a man over 40, a man whose job will be taken by a rookie and is always injured and a boy who has done a *lot* of fumbling and can't run into the end zone even when there's no-one to tackle him. His RB core is basically two players. One coming back from a serious knee injury and another old man mountain coming off a 2,000 yard season. This kind of beating surely isn't repeatable. His WRs include a one who we don't know who his QB is, a 31 year old playing second fiddle to the best rookie WR ever, a man who's nickname is 'Scary' and perennial trade rejection Amari Cooper. His main TE is a man eating a large slice of a small pie on a team which loves to run and a former QB who 'broke out' at 29.

Like with any contending team Jebus is going to need some luck and a shortage of injuries to fend off his rivals. Trading to provide more strength in depth, particularly at RB seems necessary but also at QB and TE. Alternatively, he could burn it all down. Trade the assets while values are still high and have a go with better depth in 2022 or beyond. If he doesn't do the latter and has some bad injury luck he could be holding a Golden Turd and have no future assets.

XIV. Conclusion

If you made it this far well done. As I said at the outset, the ranks are all very much relative and the relative difference in strength isn't as much as I may have laid out above (or is it???). These experts don't really know what they're talking about (or do they???) and there's still four months until the season starts. Hopefully, I've provoked some critical thinking and some much-needed trade moves for most of us (you're good AI – have a lovely relaxing summer).

We have our free agent auction draft in August and I will be in touch closer to the time to make sure we're all available. It's set for Friday 27th August at the moment. If you can't make that let me know.

Enjoy the summer but keep an eye on your WhatsApp and Sleeper app. I know there will be trade offers coming back and forth.
